### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the present claims are allowable over the closest prior art to Yoshida et al. (US 2003/0124389) and Chen et al. (US 6759149).

It is noted that the claims have been amended to delete the term “-based” from recitations directed to specific Cr and Co “based” alloys. In claim 1, for example, layer A is now selected from a group consisting of alloys including “a Cr-Ta alloy.” The examiner has interpreted the claims as newly amended to mean that the recited alloys are limited to the two (as in the case of Cr-Ta) or three (as in the case of Co-Mo-W) specifically recited elements. Thus, the claimed alloys now exclude the presence of unrecited alloying components. The original disclosure supports this interpretation of the claims and the amendment of the claims in this manner because one of ordinary skill in the art at the time of invention would have readily recognized that a disclosure of “a Cr-Ta-based alloy”, for example, would necessarily encompass the binary form of the alloy.

The closest prior art to Yoshida and Chen fail to teach or suggest an underlayer structure formed from at least two non-magnetic layers containing the specific alloys set forth in the claims. Instead, Yoshida and Chen teach the use of Co alloy underlayers which contain additional alloying elements excluded by the present claims. The prior art fails to teach or suggest a motivation to remove these unrecited elements (e.g., Cr) from the alloys taught by Yoshida and Chen.
